

Universal Kiosk

The Future of Payment Technology

The Genmega Universal Kiosk is the perfect platform to present your custom Self-Service application. It features a modern profile and includes a large 21.5" vertical touch-screen to attract attention and help you provide a unique interface to your customers.

Standard interface components include a card reader, 3" receipt printer and PCI-certified keypad useful for a variety of financial transactions. Universal Kiosk can be configured with bill acceptors, check imager, bar code scanners, ticket printer, cash dispenser, finger printer, and more options. We can also help to intergrate most any custom components your application may require.

Whether used for Bill Payment, Product Purchase, Facilitating Transactions or even as an Informational source, the Universal Kiosk can be custom tailored with a wide selection of devices to best meet the specific needs of your application.
