

RL2000

A woman with short dark hair, wearing a black dress and silver jewelry, is using a Triton RL2000 ATM. The ATM is a compact, walk-up model with a large screen displaying the ATM logo and a keypad. The background shows a convenience store with refrigerated display cases filled with various products.

ATM

Flexibility and functionality in a low-cost ATM.

Our most flexible ATM to date, Triton's low-cost RL2000 packs tons of features into a compact walk-up design, making it ideal for both high- and low-traffic locations.

With the widest range of dispensing mechanisms we've ever offered, it's the ideal choice for retail locations, as well as for bank or credit union off-premise locations. An innovative configuration—including an embedded PC-based platform, Microsoft® Windows® CE 5.0 operating system with Triton's X2 technology—makes the RL2000 as reliable as it is convenient.

And the CE 5.0 platform provides expandability to meet future compliance and application needs.

Like all Triton products, the RL2000's unique design allows for hassle-free servicing, saving time and money while eliminating the need for expensive upgrades. All this and more make the RL2000 our most feature-driven retail ATM ever—all while maintaining the low cost of ownership for which Triton is known.
